Product Category Return Rate Analysis

Dataset: E-commerce orders · Generated: 2026-11-07 00:06 UTC

Question

Which product category has the highest return rate?

Executive summary

The analysis of return rates across product categories shows that Apparel has the highest proportion of returned orders. Specifically, 8.77% of Apparel orders were returned, which exceeds the return rates of Sports (4.23%), Electronics (4.07%), Home (3.94%), and Beauty (3.45%). This indicates that Apparel products are more likely to be returned compared to other categories in the dataset.

Scope & task alignment

Scope	Value
Metric	is_returned
Grouping	product_category
Task alignment	ALIGNED

Run metric	Value
iterations	2
tool calls	2
sql queries	1
findings verified	2/2

hallucination rate	0
task alignment	aligned
total tokens	16,651
latency s	63.62

Findings

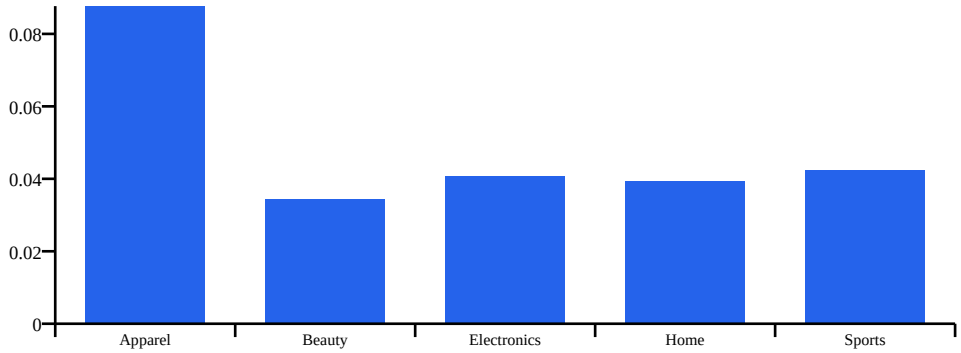
1. Highest Return Rate [VERIFIED]

Apparel exhibits the highest return rate at 0.08767 (8.77%) among all product categories.

Numbers checked: 2/2 matched tool outputs. Evidence: E1

Visualizations

Return Rate by Product Category



Limitations & caveats

• Return rate is calculated over the entire dataset without separating time periods, which may mask temporal trends.

• Missing values in the days_to_ship column (2.93%) could affect related analyses but not the return rate directly.

• The analysis assumes that the dataset is representative of overall sales and returns.

Supporting evidence

[E0] profile_dataset - Dataset understanding

18861 rows, 13 columns; 0 warnings

[E1] run_sql - Calculate return rate per product_category

```
SELECT product_category,
AVG(CAST(is_returned AS INT)) AS return_rate
FROM ecommerce_orders
GROUP BY product_category
ORDER BY return_rate DESC;
```

product_category	return_rate
Apparel	0.09
Sports	0.04
Electronics	0.04
Home	0.04
Beauty	0.03
